AI AWARENESS QUIZ – 60 QUESTIONS

One Word / One Sentence Answers

AI Companies | Latest Models | GenAI | LLMs | Agents | RAG | MCP | Image/Video/Voice | Coding AI | Hardware | Safety | 2026 AI News

Student Name: Yash Fokmare

Batch: 9011

Date: 28/10/2026

Instructions: Each question is followed by its answer. Answers are kept short and easy to understand.

Note: For a few questions asking for exact October 2026 model names, the provided question paper does not supply the answers. These are clearly marked for verification rather than guessed.

Section A – AI Companies & Latest Models

1. ChatGPT is developed by which company?

Answer: OpenAI.

2. Claude is developed by which AI company?

Answer: Anthropic.

3. Gemini is developed by which company?

Answer: Google.

4. Llama models are developed by which company?

Answer: Meta.

5. Grok is developed by which company?

Answer: xAI.

6. Mistral AI is headquartered in which country?

Answer: France.

7. What is the name of OpenAI's flagship GPT-6 frontier model?

Answer: GPT-6.

8. Which OpenAI model is positioned as a lower-cost model with near-Astra intelligence for coding and professional work?

Answer: The exact model name is not established by the provided question paper; verify with the official OpenAI model information.

9. What is Anthropic's latest Haiku model called as of October 2026?

Answer: The exact October 2026 model name is not established by the provided question paper; verify with Anthropic's official model information.

10. What is Google's latest flagship Gemini model called as of October 2026?

Answer: The exact October 2026 model name is not established by the provided question paper; verify with Google's official model information.

Section B – Generative AI & LLM Concepts

11. What does LLM stand for?

Answer: Large Language Model.

12. What is Generative AI?

Answer: Generative AI is a type of artificial intelligence that creates new content such as text, images, audio, video or code.

13. What is a prompt in Generative AI?

Answer: A prompt is the instruction or input given to an AI model to get a response.

14. What is a system prompt?

Answer: A system prompt is a high-priority instruction that guides an AI model's behaviour and response style.

15. What is an AI hallucination?

Answer: An AI hallucination is incorrect or made-up information generated by an AI model.

16. What is a token in an LLM?

Answer: A token is a small unit of text, such as a word, part of a word or punctuation, processed by an LLM.

17. What does context window mean?

Answer: A context window is the amount of input and conversation information a model can consider at one time.

18. What is inference in AI?

Answer: Inference is the process of using a trained AI model to produce an output or prediction.

19. What is fine-tuning?

Answer: Fine-tuning is further training a pre-trained model on specific data for a particular task or behaviour.

20. What does multimodal AI mean?

Answer: Multimodal AI can understand or generate more than one type of data, such as text, images, audio and video.

Section C – Agents, RAG & Modern AI Development

21. What is an AI agent?

Answer: An AI agent is a system that can understand a goal, make decisions and take actions using available tools.

22. What is the main difference between a chatbot and an AI agent?

Answer: A chatbot mainly responds to messages, while an AI agent can also plan and perform actions to complete tasks.

23. What does RAG stand for?

Answer: Retrieval-Augmented Generation.

24. Why is RAG used with LLMs?

Answer: RAG retrieves relevant external information to help an LLM give more accurate and up-to-date answers.

25. What is an embedding?

Answer: An embedding is a numerical vector representation of data that captures its meaning or features.

26. What is a vector database used for in AI applications?

Answer: A vector database stores and searches embeddings based on similarity.

27. What does tool calling allow an AI model to do?

Answer: Tool calling allows an AI model to request external tools or functions, such as APIs, to perform tasks.

28. What does MCP stand for in modern AI application development?

Answer: Model Context Protocol.

29. What is an API key used for?

Answer: An API key is used to authenticate and authorize an application when accessing an API.

30. What is meant by an agentic workflow?

Answer: An agentic workflow is a process in which an AI agent plans and performs multiple steps, often using tools, to achieve a goal.

Section D – AI Image, Video, Audio & Famous Tools

31. Midjourney is mainly famous for generating what type of content?
Answer: Images and digital artwork.

32. Sora is primarily associated with which type of AI generation?
Answer: AI video generation.

33. What is the name of OpenAI's current image-generation model family?
Answer: GPT Image.

34. What does text-to-image mean?
Answer: Text-to-image means generating an image from a written description.

35. What does text-to-video mean?
Answer: Text-to-video means generating a video from a written description.

36. What does TTS stand for?
Answer: Text-to-Speech.

37. What does STT stand for?
Answer: Speech-to-Text.

38. What does OCR do?
Answer: Optical Character Recognition extracts text from images or scanned documents.

39. What is a vision-language model?
Answer: A vision-language model is an AI model that processes visual information and connects it with language.

40. What is voice cloning in AI?
Answer: Voice cloning is creating an artificial voice that imitates a person's voice using audio samples.

Section E – Coding AI, Hardware & Practical Awareness

41. GitHub Copilot is mainly used for what purpose?

Answer: It helps developers write, complete, explain and debug code.

42. Cursor is mainly used for what type of work?

Answer: AI-assisted software development and coding in an AI-powered code editor.

43. What is an AI coding assistant?

Answer: An AI coding assistant is a tool that uses AI to help write, explain, test or debug code.

44. What hardware component is most commonly used to train large AI models?

Answer: GPU (Graphics Processing Unit).

45. What does GPU stand for?

Answer: Graphics Processing Unit.

46. What does NPU stand for?

Answer: Neural Processing Unit.

47. What is VRAM mainly used for during AI workloads?

Answer: VRAM stores the data and model parameters needed by the GPU during AI workloads.

48. What does running an AI model locally mean?

Answer: It means executing the model on your own computer or device instead of a remote cloud server.

49. What is an open-weight AI model?

Answer: An open-weight AI model is a model whose trained weights are publicly available for download and use, subject to its licence.

50. What is model distillation?

Answer: Model distillation transfers knowledge from a larger model (teacher) to a smaller model (student).

Section F – Latest AI Awareness & 2026 News

51. Which OpenAI model family includes Astra, Sol and Luna?

Answer: The exact family name is not established by the provided question paper; verify with the official OpenAI model information.

52. Which OpenAI GPT-6 model is designed for the most demanding frontier work?

Answer: The exact model variant is not established by the provided question paper; verify with the official OpenAI model information.

53. Which Claude 5.5 model is positioned for complex agentic coding and knowledge work?

Answer: The exact model name is not established by the provided question paper; verify with Anthropic's official model information.

54. Which Claude 5.5 model is designed for fast, high-volume and cost-sensitive work?

Answer: The exact model name is not established by the provided question paper; verify with Anthropic's official model information.

55. What is Google's Gemini 4 flagship model called?

Answer: The exact model name is not established by the provided question paper; verify with Google's official model information.

56. What is the name of OpenAI's current model family for advanced image generation and editing?

Answer: GPT Image.

57. What is the name of OpenAI's current realtime voice model family?

Answer: GPT-Live.

58. Which company develops the Claude Opus, Sonnet and Haiku model families?

Answer: Anthropic.

59. What AI safety risk occurs when malicious instructions are hidden inside external content and try to control the model?

Answer: Prompt injection.

60. Why should important medical, legal, financial or business information generated by AI be verified by a human?

Answer: Because AI can make mistakes or provide outdated or incomplete information, so a qualified human should verify important decisions.
